- Transmission range: up to 10 meters
- Dimension: 140(L) x 126(W) x 47(H)mm
- *Self customizable buttons are only for Microsoft Windows system.

Product & Accessory

1. Air Keyboard Conqueror*1
2. Dongle receiver*1
3. Mini USB Cable *1
4. CD Software for Definable Buttons & User Manual *1
5. Lithium-ion rechargeable battery*1

Installation Guide

1. Battery & Charging
   - Before using the device for the first time, you must charge Air Keyboard via mini USB port for approximately 3 hours.
   - When fully charged, the battery provides approximately 20 hours of operation time (actual performance may vary according to user habit and battery condition).
   - When the battery is low, the green LED light will flash slowly. (Please refer to Section 5 below for LED indicator).
   - If you intend not to use the product for a long period of time, remove the battery.
2. Installation
1) Connect Air Dongle to the computer.
   (Make sure the blue LED on Air Dongle is blinking before turn on the Air Keyboard Power).
2) To avoid interference, if you are using more than one wireless dongle at a time, the distance between each dongle should be more than 50cm.
3) Press the power button once to turn on the power of Air Keyboard. After idling for 1 minutes, Air Keyboard will switch off to save power, press the power button to turn it on again.
4) After connecting the Air Dongle to the USB port of the computer, the system will automatically search for Air Keyboard and establish connection.

3. User definable buttons (Applies to Windows OS)
Get quick access to the media, programs, and files you use most often with definable buttons.
1) Please insert the Driver CD and follow steps on screen to install.
2) Please select the device name which you bought from the pull down menu.

Block 1:
Buttons: Select the button you want to define one at a time.

Block 2:
The access buttons could be customized with one of the 3 different methods.
1) Application: Click the Browse button, find the file or software you want to access with definable button.
2) Pull down menu: Select the program or command from the pull down menu.
3) Key: Specify the combinations of keys to be executed with a definable button.

Block 3:
Show you the current settings of each definable buttons.

Note:
Press Apply to confirm the setting.
Press OK to finish the setting.
Press Exit to quit the function of quick access.
4. Function of Keyboard Buttons

1) Please use the button to select the mouse mode. The mode switches in a cycle (enable 3D mouse/ disable mouse function).

Under 3D mode:
Move Air Keyboard to control the gyro mouse and use the mouse left click and mouse right click buttons for left/right click.

   Charging: Red LED on.

1) Blue LED indicator for linking status
2) Blue LED: power status.
3) Green LED: fully charged, Red LED: charging
Troubleshooting:
If Air Keyboard does not work properly, please follow these troubleshooting methods.
1) Make sure the battery is properly installed and the battery contain enough power. When the remaining power is insufficient, the power status indicator will be blinking; the battery needs to be charged otherwise the Air Keyboard will power off automatically.
2) If Air Keyboard does not work properly even with sufficient power, make sure Air Keyboard is turned on and try these steps:
   a) Remove Air Dongle. Then, reconnect Air Dongle and try again.
   b) Try a different port or environment:
      Try to connect the Air Dongle to a different USB port.
      Then, check the operation of Air Keyboard. By trying Air Dongle in a different port, you can eliminate any issues caused by the port.
   c) Test the device on a different computer
      If the issue continues to occur, test the keyboard on a different computer in a different environment.
3) The pairing between Air Dongle and Air Keyboard was completed before shipment
   If the above steps do not solve your issue, it might be that the pairing was lost, perform the following pairing steps again:
   1) Connect Air Dongle to the computer.
   2) Bring Air Keyboard next to Air Dongle within 30cm.
      Press the “Windows” and “mouse right click” buttons at the same time for 5 seconds. Air Keyboard will search for Air Dongle and the Air Dongle LED indicator will be blinking.
      When the pairing is completed, Dongle LED will no longer blink and you can start using Air Keyboard.
      If Air Keyboard does not work correctly after the above steps are performed 3 times, please consult your dealer.

Warranty Information:
Air Keyboard comes with 1 year limited warranty. Please contact your dealer for details in case of warranty claims. The warranty will void in the case that the defect has been caused by misuse, neglect, improper installation, repair, alteration or accident. Gideko bears no responsibility for failure or defect caused by any third party product or components whether authorized or not.
