4. Charging your mobile devices
4-1. Check the remaining capacity of the power-pack. If the capacity is low, please charge it as indicated in step 1 before proceeding to the following step.
4-2. Select the proper connector (Φ) for your mobile device.
4-3. Make the connection: Connect the connector to the cable, insert the connector into your mobile device, and plug the cable into the output port of the power-pack (refer to Pic5).
4-4. Once the proper connections have been done, the power-pack will begin to charge your mobile device accordingly, the working indicator (Use) will turn on and your device will display that it is being charged.

Note: After being connected properly, the working indication light will flash at frequency of 2 times per second, that is to show the power pack is at working state.

Attention in using
◆ Please read this manual carefully before using the product.
◆ Be sure to select the proper connector in order to prevent damage.
◆ Do not connect the power pack to a device and do not attempt to supply power to a device while power pack is being recharged.
◆ Do not leave any cable plugged into the power pack except when it is being recharged or except when it is supplying power to a device.
◆ Use only the pre-qualified adapter provided by our dealers that is supplied with the product. Do not use any other adapters, as this may be dangerous to you, other devices and the product.

Storage and maintenance
◆ Please read this manual carefully before using the product.
◆ If your power pack will not be used for an extended period of time, please take the following steps once a year to ensure proper functioning:
  1) Charge the power pack;
  2) Discharge the power pack by using it to supply power to a mobile device;
  3) Recharge the power pack for 1.5 hrs;
  4) Store the power pack in a cool and dry place.
◆ Do not expose the power pack to above 60°C or high humidity to avoid short circuit and battery damage.
◆ Dispose the power pack properly. Do not dispose it in receptacles and do not attempt to incinerate it.

Troubleshooting
If you are experiencing difficulties with your power pack:
1. Check the following items in the table to find a possible cause and solution.
2. If you still unable to solve the problem, consult your power pack dealer or service station.
