VFM-002 Instructions

1) Insert 2 AAA batteries into the battery compartment or connect 12v power supply. The LCD display will show the time.

2) Press Power switch button once to enter transmit mode. LCD will show the current transmit frequency. Press channel up/down button to increase or decrease the frequency. Press the Power switch button once again to stop transmitting and the real time will show on the LCD display.

3) To store the correct frequency press the set button (the round button, between the arrows). The memory number will show on the display.

4) To set the time make sure that the screen is displaying the time. Press and hold the set button for about 3 seconds. The time will flash and then you can use the up/down buttons to change the time. Press the set button for about 3 seconds again to confirm and return to the time screen.

5) To turn the device on or off press the power switch button for 3 seconds.

6) The device has a low battery detect function to warn you that the batteries will need changing.
